Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/760,083	Applicant(s) BLACKBURN ET AL.	
	Examiner Robert A. Hopkins	Art Unit 1724	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 16 February 2006.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 10-29 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 10-29 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 10-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The subject matter is the recitation of "the carbon of said monolithic porous carbon structure is not bound to silica". While the examples are all directed to the use of organic materials, there is nothing to support that the porous carbon structure formed from such organic materials "is not bound to silica". Accordingly such quoted language(new matter) must be cancelled from these claims".

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10-29(without the new matter) are again rejected under 35 U.S.C. 102(b) as being clearly anticipated by the filter element and the filter apparatus containing such filter element of WO 99/62616 to Tennison et al.

Response to Arguments

Applicant's arguments filed 2-16-06 have been fully considered but they are not persuasive.

Applicant argues the specification clearly describes that the present invention does not use any ceramic binder or silica and in fact clearly distinguishes the prior art using such a binder. Applicant notes page 12 lines 10-19 that the specification describes that extruded monoliths prepared by using a ceramic material as a binder suffer from the primary defects of low carbon contents, poor thermal and electrical conductivity and relatively poor strength.

Examiner respectfully submits that the section noted by applicant does not mention that carbon of the monolithic porous carbon structure is not bound to silica. Examiner also notes that the section in the specification relates to ceramic materials, wherein the term ceramic can refer to a lengthy selection of materials, and wherein someone of ordinary skill in the art would not be able to properly extrapolate the specific term "silica" from the generic term "ceramic". Examiner notes page 12 line 12 of the specification refers to US patent 6284705 to show a ceramic material is used as a binder for a particulate carbon matrix. However claim 12 of the patent states "wherein the ceramic forming material is selected from the group consisting of ball clay, plastic kaolins, smectite clay minerals, bentonite, and combinations thereof". Examiner notes that the prior art patent referred to does not list silica as a specific ceramic material, and therefore

Art Unit: 1724

someone of ordinary skill in the art would not be able to properly extrapolate that silica used as a binder would provide for an extruded monolith which suffers from the primary defects of low carbon contents, poor thermal and electrical conductivity and relatively poor strength, as stated in the current specification for a "ceramic" material.

Examiner notes two court cases which state that: " what is conventional or well known to one of ordinary skill in the art need not be disclosed in detail. See *Hybritech Inc. v. Monoclonal Antibodies, Inc.*, 802 F.2d at 1384, 231 USPQ at 94. If a skilled artisan would have understood the inventor to be in possession of the claimed invention at the time of filing, even if every nuance of the claims is not explicitly described in the specification, then the adequate description requirement is met. See, e.g., *Vas-Cath*, 935 F.2d at 1563, 19 USPQ2d at 1116; *Martin v. Johnson*, 454 F.2d 746, 751, 172 USPQ 391, 395 (CCPA 1972) (stating "the description need not be in *ipsis verbis* [i.e., "in the same words"] to be sufficient"). Examiner respectfully submits that a monolithic porous carbon structure which is not bound to silica is not conventional or well known to someone of ordinary skill in the art. Therefore, someone of ordinary skill in the art, by reading the term "ceramic" from the current specification, would not be able to conclude that silica is a material that should not be bound to a monolithic porous carbon structure.

Art Unit: 1724

Applicant's argue against the 102(b) rejection over WO 99/62616 because the WO reference teaches a "carbon structure which comprises a porous silica substrate having carbon bound to at least the surface of the substrate".

However, the current rejection is based on claims 10 and 20 which do not include the amended, and new matter, limitations. Therefore, the WO reference clearly anticipates claims 10-29.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

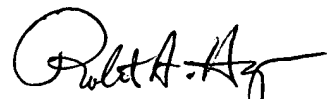

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Hopkins whose telephone number is 571-272-1159. The examiner can normally be reached on Monday-Friday, 7am-4pm, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on 571-272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
